## Abstracts

Computed Tomography (CT) Scanners are medical imaging devices that use X-rays and computer processing to produce detailed images of the body's internal structures. These imaging devices generate cross-sectional images of the body, which provide doctors and healthcare professionals with valuable information about various conditions and diseases. CT Scanners are widely used in the diagnosis and treatment planning of different medical specialties, including oncology, cardiology and vascular, neurology, among others.

According to the latest market research report, the global Computed Tomography (CT) Scanners market size is projected to reach US\$6,390 million by 2022, with a compound annual growth rate of 5.8%. The increasing prevalence of chronic diseases, such as cancer, heart disease, and neurological disorders, is one of the primary factors driving market growth. Additionally, technological advancements in imaging technology have led to the development of more advanced and accurate CT Scanners, further fueling market growth.

The Computed Tomography (CT) Scanners industry is segmented into four major categories based on its use, including oncology, cardiology and vascular, neurology, and others. Among these, the oncology category dominates the market due to the high prevalence of cancer and an increasing emphasis on early diagnosis and treatment. The neurology category is expected to witness significant growth in the coming years, owing to the rising incidence of neurological disorders.

The global Computed Tomography (CT) Scanners industry is highly competitive, with several global players actively engaged in product innovation and development. The major global manufacturers in the Computed Tomography (CT) Scanners industry

include Koninklijke Philips N.V. (Netherlands), GE Healthcare (U.S.), Toshiba Corporation (Japan), Siemens AG (Germany), Hitachi Ltd. (Japan), Shimadzu Corporation (Japan), Samsung Electronics Co., Ltd. (South Korea), Neusoft Medical Systems Co., Ltd. (China), Medtronic plc (Ireland), Shenzhen Anke High-tech Co., Ltd. (Hong Kong), PlanMED (Finland), Koning Corporation (U.S.), Carestream Health Inc. (U.S.), and PointNix Co. Ltd (South Korea). These manufacturers focus on expanding their product portfolios, enhancing their distribution networks, and increasing their geographic reach through strategic partnerships, collaborations, and acquisitions.

North America dominates the Computed Tomography (CT) Scanners market, followed by Europe and the Asia-Pacific region. The high prevalence of chronic diseases and the significant investments in healthcare infrastructure are the primary reasons behind the dominance of the North American region. The Asia-Pacific region presents significant growth opportunities due to the improving healthcare infrastructure, emerging economies, and the rising incidence of chronic diseases.

Despite the growing market, there are still some challenges that manufacturers face that may limit growth prospects. These challenges include the high cost of Computed Tomography (CT) Scanners, competition from alternative diagnostic techniques, and strict regulatory requirements that need to be followed while manufacturing.

In conclusion, the Computed Tomography (CT) Scanners industry is projected to witness significant growth in the coming years due to the increasing prevalence of chronic diseases and rising healthcare spending. The major global manufacturers are investing in research and development to create innovative products and expand their market share. The Asia-Pacific region presents significant growth opportunities due to improving healthcare infrastructure and rising investments in healthcare. However, challenges such as high costs, competition from alternative diagnostic techniques, and regulatory hurdles can limit adoption and growth. Manufacturers should focus on improving product quality and safety, reducing costs, developing innovative products that meet the changing customer needs, and targeting emerging markets to overcome these challenges and sustain growth in the long term.
