Abstracts

Disposable Sterile Acupuncture Needles are devices used in acupuncture therapy to penetrate the skin at certain points on the body. These needles are disposable and designed to be used only once to prevent transmission of infectious diseases. The needles are sterilized using gamma radiation or ethylene oxide to ensure safety and effectiveness.

The global Disposable Sterile Acupuncture Needles market size is projected to reach \$110 million by 2022, with a compound annual growth rate of 6.5% from 2017 to 2022. The increasing popularity of acupuncture therapy, coupled with the disposable nature of these needles, is driving the growth of this industry. Disposable Sterile Acupuncture Needles are widely used in hospitals, clinics, households, and other healthcare settings.

The major global manufacturers in the Disposable Sterile Acupuncture Needles industry include Empecs, SEIRIN, Dongbang, Suzhou Medical, Suzhou Acupuncture, Asiamed, Wuxi Jiajian, Cloud & Dragon, and AIK Medical. These companies are investing in research and development activities to develop new and improved disposable sterile acupuncture needles. For instance, SEIRIN recently launched the D-type needle, which features a new type of handle that improves grip and reduces slippage during use.

Disposable Sterile Acupuncture Needles offer several advantages over traditional acupuncture needles. Their disposable nature eliminates the need for time-consuming and costly sterilization processes. They also reduce the risk of infection and cross-contamination due to their single-use design. This, in turn, improves patient safety and reduces healthcare costs.

North America is currently the largest market for Disposable Sterile Acupuncture

Needles, followed by Europe and Asia-Pacific. The rising prevalence of chronic diseases, increasing awareness and acceptance of alternative therapies, and growing demand for home healthcare services are driving the growth of this industry. Furthermore, the expansion of healthcare infrastructure in emerging markets is expected to further boost demand for Disposable Sterile Acupuncture Needles.

In conclusion, the Disposable Sterile Acupuncture Needles industry is a growing market with significant potential for growth due to increasing demand for alternative therapies, rising prevalence of chronic diseases, and expanding healthcare infrastructure. The major manufacturers in the industry are investing in research and development activities to develop new and improved products to gain a competitive advantage. As the use of disposable sterile acupuncture needles becomes more widespread, the industry presents potential growth opportunities for manufacturers in both developed and emerging markets.
