Abstracts

Periphery Nerve Repair refers to the branch of medicine that deals with the restoration of normal nerve function and the repair of damaged or injured peripheral nerves. These nerves are responsible for transmitting sensory, motor and autonomic signals from the spinal cord to the rest of the body.

Periphery Nerve Repair is mainly used to treat patients suffering from nerve damage due to trauma, injury, or disease. Direct Nerve Repair is a method where the damaged nerve is sewn back together after removing any damaged or scarred tissue. Nerve Grafting involves the use of a healthy nerve from another part of the body to replace the damaged section of the affected nerve.

The global Periphery Nerve Repair market size in 2022 will be US\$205 million, with a compound annual growth rate of 19%. The market is expected to reach US\$649 million by 2027, with a CAGR of 17.3%. The increasing incidence of peripheral nerve injuries and the growing demand for effective treatment options are driving market growth. Technological advancements in nerve repair techniques and materials are also contributing significantly to market growth.

The Periphery Nerve Repair industry is dominated by several major global manufacturers, including Axogen (USA), Integra (USA), Synovis (USA), Collagen Matrix (USA), Polyganics (Netherlands), Checkpoint Surgical (USA), Neurotex (United Kingdom), and Toyobo (Japan). These companies offer a range of products, including nerve guides, nerve wraps, nerve connectors, and nerve grafts. They also provide patient care services and support.
