Abstracts

Spectrophotometer is an analytical device used to measure the quantity of light absorbed by a sample at various wavelengths. The instrument works by passing light through a sample and measuring the intensity of light that emerges from the other side. Spectrophotometers are widely used in various industries, including pharmaceuticals, biotechnology, industrial chemistry, food and beverage, environmental, and others, for analysis, quality control, and research purposes.

The global spectrophotometer market size is expected to reach US\$14100 million by 2022, growing at a compound annual growth rate (CAGR) of 7.2%. The increase in demand for spectrophotometry in different industries, the rising need for analytical instruments for scientific research, and increasing government funding for R&D activities are some of the major factors driving the growth of the industry.

The pharmaceutical and biotechnology sectors are the largest end-users of spectrophotometers, accounting for a significant share of the overall market. The rise in the number of new drug discoveries, the need for analyzing complex biological systems, and strict quality control regulations are driving the demand for spectrophotometry in these industries.

In the food and beverage industry, spectrophotometers play a crucial role in ensuring product quality and safety. They are used for analyzing the nutritional content of food products, detecting contaminants, and monitoring food processing conditions.

The spectrophotometer industry is dominated by major global manufacturers such as Agilent, Thermo Fisher, Hitachi, Shimadzu, PerkinElmer, Hach, Beckman Coulter, Xylem, VWR, Biochrom, Analytik Jena, JASCO, BioTek, Bibby Scientific, PG Instruments, B&W Tek, INESA, Spectrum, Shanghai Lab-Spectrum Instruments. These companies are investing heavily in research and development to develop more

advanced spectrophotometers and expand their product portfolios.

In conclusion, the spectrophotometer industry is a growing market with significant potential for growth due to the increasing demand for analytical instruments across various industries and the growing investments in R&D activities. The major players in the industry are investing in research and development to develop more advanced spectrophotometers and gain a competitive advantage. As such, the spectrophotometer industry is a promising market with potential growth opportunities for manufacturers in both developed and emerging markets.
