Abstracts

The Global Software Industry today is a \$267Bn market that drives many technological and societal innovations. The industry contributes to overall productivity and growth of the economy because of the high levels of competitiveness and innovation it brings to other industries, and the enabling role IT plays in changing the way other sectors do business every day. Having recovered from a stagnant year in 2010, the global software market grew by 8.2 per cent and reach \$267Bn (£165bn) in 2011. Despite the worrying economic situation, no dramatic cuts to enterprise IT budgets were seen in 2011 and same will be the case going forward from 2012 to 2020. In-fact over the next four years, the market will achieve a compound annual growth rate of 7.7 per cent, reaching revenues of \$358Bn (£222bn) in 2015, during 2015 to 2020 the market will grow at a compound annual growth rate of 5.2 per cent reaching \$462Bn (£286bn) in 2020 as companies use software to tackle huge increases in data and improved enterprise mobility.

Global Social Media revenue has reached \$10.3Bn in 2011, a 41.4 per cent increase from 2010 revenue of \$7.3bn. Worldwide Social Media revenue is forecast for consistent growth with 2012 revenue totalling \$14.9Bn, and the market is projected to reach \$29.1Bn in 2014, \$58.1Bn in 2016, will touch magical mark of \$100Bn towards early part of 2018 and by the end of 2020 it will grow substantially closing at around \$233bn.

While presently North America, Europe and Asia Pacific are substantial contributors in Social Media Marketplace there would be substantial reorganization. Asia and Oceania which contributed 30.60 per cent of global Social Media revenue in 2010 will be contributing around 35.90 per cent by 2020. North America and the Caribbean which contributed 27.60 per cent of global Social Media revenue in 2010 will be contributing

around 18.70 per cent by 2020. Europe which contributed 25.30 per cent of global Social Media revenue in 2010 will be contributing around 16.30 per cent by 2020. Latin America which contributed 7.80 per cent of global Social Media revenue in 2010 will be contributing around 13.60 per cent by 2020. Middle East which contributed 4.90 per cent of global Social Media revenue in 2010 will be contributing around 6.60 per cent by 2020. Africa which contributed 3.80 per cent of global Social Media revenue in 2010 will be contributing around 9.20 per cent by 2020.

Today Social Technology is emerging as a way not only for doing marketing, branding, and getting the customer satisfaction and employee satisfaction pulse but also in product improvement, strategy formation, business modeling and many other key business areas. Social Technology market includes spending in technologies having direct relationship to Social Computing. Whether it is Grid or Cloud Computing or Linked Data Infrastructure and Even Mobile Application Platform all comprise Social Technology Market. The size of Social Technology market as of now is \$35Bn and will grow to \$123Bn by 2015 and \$552Bn by 2020.

HnyB Insights is working in the field of Social Media for a long time and hence it has tremendous experience in the field. Professional from HnyB Insights knows each aspect of Social media very well which helps HnyB Insights to generate new business ideas, form new strategies and Create Innovative Product Ideas.

Overview

The Internet has always been a social medium. It is unique because it is the first many-to-many communication channel, while the telephone is one-to-one and broadcast is one-to-many. The Internet is so unique because it has always been all about a common man being able to communicate with the rest of the mankind. As e-mail became more ubiquitous, discussion forums sprang up and never went away delivering knowledge to millions and people learned how to build web sites which was cheap and required neither a permit nor an advanced degree. Blogging brought together the power of the conversation with a giant leap forward in ease of use. Flickr and YouTube made uploading pictures and videos a snap. Then Facebooks and Twitters of the social world made opt-in, instant messaging so simple, it couldn't help but catch fire or create a perfect storm. It is the "great playing field leveller", allowing David to square off against the media-controlling Goliath. Internet which was always a hyper drive communication tool has now become a nuclear-powered communication tool on steroids, Technology

enabled Social Communication or Social Networking and Social Media in general term.

Social Technology is a tool which allows anybody to communicate with everybody. In other words, audience/consumer-generated content distributed through easy-to-access online tools. Social Technology is capturing media, business, political, and scholarly attention. Hence their spectacular growth and the public attention they command are attracting a significant amount of research and media scrutiny. While the impact of this emerging technology development is huge it is important not to get lost in heaps of data generated on this subject. In order to leverage the true power of Social Technology one need to understand this phenomena which is a true convergence of Human Psychology, Media and Technology. Technology being the driver is a vital part of this development but the key is to understand that People are at the centre of any Social Technology initiative.

HnyB Insights due to its understanding of multiple aspects of the Social Technology ecosystem along with consolidated experience of tracking every player of this value chain for years provides knowledge and intelligence on the subject. HnyB Insights' research provides granular as well as broad base perspective on diverse segments of this marketplace.
