## Abstracts

HNY Research projects that the Advanced Phase Change Materials (APCMs) market size will grow from XX Million in 2017 to XX Million by 2023, at an estimated CAGR of XX %. The base year considered for the study is 2017, and the market size is projected from 2018 to 2023.

Advanced phase change materials (APCMs) are capable of storing and releasing high amounts of energy, whenever these materials change their state. Phase change materials can be segmented into organic, non-organic and bio-based. Increase in total energy supply, growth of construction industry in developed and developing economies and superior heat storage capacity of these materials are a few key drivers which are expected to increase the demand for APCMs. In addition, increasing use of these materials in textile industry and temperature controlled packaging coupled with the growth of these industries is expected to boost the demand over the next few years. However, the high cost and hazardous nature of these materials is expected to hamper the growth of this market. Economic growth in emerging economies of Asia Pacific is expected to open new opportunities for the growth of this market.
