## Abstracts

HNY Research projects that the Dental Sterilization market size will grow from in 2017 to by 2023, at an estimated CAGR of. The base year considered for the study is 2017, and the market size is projected from 2018 to 2023.

Growth in the dental sterilization market is mainly driven by factors such as the increasing number of dental facilities and the growing pool of dental care personnel, growing prevalence of dental ailments, and increasing demand for cosmetic dentistry. The emerging markets are expected to provide a wide range of growth opportunities for players in the market. On the other hand, stringent regulations on dental device sterilization and increasing outsourcing of dental sterilization services to third-party reprocessors are expected to limit market growth in the coming years. Sterilization and cleaning of high-tech dental devices and noncompliance with sterilization standards may also challenge market growth to a certain extent.
