HNY Research projects that the Domestic Booster Pump market size will grow from USD XX Million in 2017 to USD XX Million by 2023, at an estimated CAGR of XX%. The base year considered for the study is 2017, and the market size is projected from 2018 to 2023.

In recent years, the residential construction industry has grown at a good pace. Increasing urban population and growing disposable income are the factors affecting the lifestyle of individuals. Booster pumps are one of the important aspects of residential flats, houses, farm houses, and guest houses. Increasing population pressure and growing density results in varying water pressure during peak hours as demand rises. Furthermore, growing water consumption through single water source and poor water management of municipal corporations drives the growth of the booster pump market.
