Abstracts

HNY Research projects that the Organic Solar Cell market size will grow from XX Million in 2017 to XX Million by 2023, at an estimated CAGR of XX %. The base year considered for the study is 2017, and the market size is projected from 2018 to 2023.

The organic photovoltaic industry is witnessing commercial gains as demand for eco-friendly photovoltaic technology is on the rise. Organic solar cells are advantageous over their conventional counterparts as they can be transformed into different shapes and colors. This makes them the preferred choice for applications that focus on design and flexibility over efficiency. Furthermore, subsidies and tax benefits provided by various governments for the use of renewable energy is augmenting the growth of organic solar cells market. On the other hand, smaller lifespan and low efficiency of organic solar cells are two major factors restraining the growth of this market. In addition, the nascent phase of the photovoltaic industry involves high capital investment for the research and development of new products.
