Labelling is a standard procedure to provide the consumer an insight of the manufacturer's proprietorship and customary product details. Automated labelling is done to label any product and is currently utilized by factories and industries worldwide. The machines used to stick labels on the test tubes are known as tube labelling machines or systems. An automatic tube labelling system offers different labelling options for use on test tubes. Automatic tube labelling systems are basically used in the field of chemistry, hematology, virology, genetics, DNA sequencing, forensics, drug discovery and other related fields for labelling and tracking samples. The automatic tube labelling system provides precise placement of pre-printed labels and eliminates the need for a manual or hand-apply process by offering fully automated features. They are designed to eliminate human errors, enhance productivity and to facilitate the workflow in the lab. The automatic tube labelling systems offer different labelling speed, can apply label of different sizes and shapes, and they have a feature of integration with the automation system.
