LED lamps are energy efficient, possess a long lifetime and have a service life of 50,000 hours or more. They are rugged as they consist of a solid material and do not contain any filament or tube that is fragile. LED lamps require no warm up period and they light instantly in nanoseconds. They are also environmentally friendly as they consume less energy and do not contain mercury or any other hazardous substances. Due to these desirable properties of LED, they are ideal in situations where lamps are required to be switched on and off frequently and can be easily dimmed. As LED lamps do not wash out colors like fluorescent lamps, they are perfect for displays and retail applications as well. Besides, LED lighting has zero UV emissions and they can also run on low voltage power supply. Due to these distinct advantages of LED lighting, the global market for LED lighting is expanding at a fast pace and LED lighting has the potential to revolutionize the lighting sector.
