A 3D stereoscopic drawing doodling printing pen is basically something that looks like a bulkier version of an ordinary pen or a pencil, however, instead of using the traditional lead or ink that is used in pencils or pen, the 3D printing pen operates using plastic. It is compact and easy to use, the 3D pen allows you to draw in the air, whether freestyle 3D sketching or tracing shapes to make larger structures and objects. At present, in developed countries, the 3D Stereoscopic Drawing Doodling Printing Pen industry is generally at a more advanced level. The world's largest enterprises are mainly concentrated in USA and China. Meanwhile, foreign companies have more advanced equipment, strong R & D capability, and leading technical level. However, foreign companies' manufacturing cost is relatively higher, compared with Asia companies. Many big name brands have transferred their production to the original equipment manufacturer in China. With the growth of China labor cost, it will be a mainstream trend to transfer to other low labor cost countries in Asia region.
