Liquid cold plates allow the cooling of the most of electronic components thanks to the circulation of liquid inside of a metal plate. The contact between the plate and the component extract calories and transmit them to the fluid circulating into the canals. The plate can integrate a system of turbulators in order to improve the thermal exchange and the homogeneity of the temperature under the component. Aavid holds 21.05% of the global market share. In the United States and Europe, Aavid, Lytron, Wakefield-Vette, Wieland MicroCool and Columbia-Staver are important players in the market. The USA is the largest consumption area of the Aluminum Cold Plate by volume in 2018 with 38.60% of global total consumption volume share. Europe and China are the followings with 15.20% and 31.17% by share. China is the world's largest exporting country.
