The global Automatic Tire Inflation System market was valued at 152.57 Million USD in 2021 and will grow with a CAGR of 8.21% from 2021 to 2027, based on HNY Research newly published report.

The prime objective of this report is to provide the insights on the post COVID-19 impact which will help market players in this field evaluate their business approaches. Also, this report covers market segmentation by major market vendors, types, applications/end users and geography(North America, East Asia, Europe, South Asia, Southeast Asia, Middle East, Africa, Oceania, South America).

Automatic tire inflation systems (ATIS) work to overcome one or more of the causes of tire underinflation by monitoring tire inflation pressure relative to a pre-set target and re-inflating tires whenever the detected pressure is below the target level. The tire inflation system not only increases vehicle mobility and reliability when moving, it also helps to ensure that a need for vehicle recoveries is avoided as far as possible. It also prevents unnecessary damage to fields. Moreover, simple adjustments to correct the air pressure ultimately reduce tire wear. On the basis of type, the automatic tire inflation system market is segmented into tractors, trucks, trailers, and others. The trucks segment is expected to account for the larger share of the global market in 2017. End-users, included in this market are military, commercial, agriculture usage. The military application account for the largest share of the global market in 2017. Based on regions, the global automatic tire inflation system market is segmented into North America, Europe, Asia-Pacific, South America, Middle East and Africa. North America is expected
