The global Automotive Motor market was valued at 4784.29 Million USD in 2021 and will grow with a CAGR of 2.78% from 2021 to 2027, based on HNY Research newly published report.

The prime objective of this report is to provide the insights on the post COVID-19 impact which will help market players in this field evaluate their business approaches. Also, this report covers market segmentation by major market vendors, types, applications/end users and geography(North America, East Asia, Europe, South Asia, Southeast Asia, Middle East, Africa, Oceania, South America).

Motors are devices used to transfer or transform electric power according to the principle of electromagnetic induction. Automotive motors include various used in vehicles, such as powertrain motor, power seat motors, wiper motors, etc. Generally, a normal saloon car will equip about 20~30 motors and a luxury saloon car may need 3 times. For commercial vehicles, the amount of motors equipped is also more than 10. These automotive motors are very important to vehicles. Automotive motors include various motors used in automotive, the product structure is chaos. The price of different type product is large. Enterprises like Mabuchi can supply several times of other company's production, but its production value is not as high as production in market share due to the low price. As a high tech industry, the manufacturing technology of automotive motors is mature but only these international giants can supply the high end products with excellent performance. There is still a core technical barrier. The automotive motors market concentration is rather high as the major manufacturer occupied large share of the market. International giants like Bosch, Asmo have built many factories around the world, especially in China, where the automotive industry

developed fast and the market demand is larger and larger. Facing the fierce competition, Chinese manufacturers should invest more on research and development to maintain and expand their market share. While these international giants should take measures like introduce new products, build new factories to hold their position in market.
