Automotive trailers are popularly used across the globe for transportation of materials and goods. These vehicles can be towed by hitches and can be further trailed by trucks, cars, SUVs, and traction engines. Some of the common things that are transported using automotive trailers are heavy cargo, bicycles, fishing boats, and mobile homes. The automotive trailers gained immense popularity after the trailers acted as mobile homes and recreational vehicles.Reduction in cost in terms of fuel consumption & emission, extra carriage capacity of the automotive trailers, and their environment-friendly nature impact the growth of the market. In addition, high maintenance cost, reduced resale value, as well as the development of the transportation and logistics industry also affect the growth of the global automotive trailer market. These factors are anticipated to either drive or hamper the market growth.
