The global Battery Additives market was valued at 1099.03 Million USD in 2021 and will grow with a CAGR of 5.38% from 2021 to 2027, based on HNY Research newly published report.

The prime objective of this report is to provide the insights on the post COVID-19 impact which will help market players in this field evaluate their business approaches. Also, this report covers market segmentation by major market vendors, types, applications/end users and geography (North America, East Asia, Europe, South Asia, Southeast Asia, Middle East, Africa, Oceania, South America).

Battery additives are components that enhance the performance of the batteries and improve their service life. Additionally, they enhance a battery's charge holding capacity too. Battery additives have numerous applications and can mainly be categorized into lead acid and lithium-ion types. The global battery additives market is expected to grow exponentially in the forecast period owing to the recent developments in the market. The growing demand for Li-ion batteries in consumer electronics, high adoption of HEV, PHEV, and EV in the automotive industry, and the increasing investments in renewable energy are factors fueling the growth of the market. However, underdeveloped support infrastructure for EVs is a major restraint for market growth.
