BOPET, Biaxially-Oriented Polyethylene Terephthalate, film made from PET is stretched in two different directions. The resulting film is water resistant and typically transparent. It is known for its high tensile strength, good chemical resistance, and gas and aroma barriers. It is typically used for food packaging and as a protective covering over paper. BOPET film is mainly made from PTA and MEG. Due to its good performance, the product is widely used in many fields. Among various applications, packaging is the largest consumption field, which accounted for 61.59% share in 2015 globally.
