The global Cargo Handling Equipment market was valued at 1918.47 Million USD in 2021 and will grow with a CAGR of 1.97% from 2021 to 2027, based on HNY Research newly published report.

The prime objective of this report is to provide the insights on the post COVID-19 impact which will help market players in this field evaluate their business approaches. Also, this report covers market segmentation by major market vendors, types, applications/end users and geography(North America, East Asia, Europe, South Asia, Southeast Asia, Middle East, Africa, Oceania, South America).

The important factors driving the growth of this market include the demand for passenger cars and commercial vehicles. However, a major restraint for the brake friction products market is the increasing life of brake friction products. The constantly increasing seaborne trade, industrial production, and air cargo is driving the demand for cargo handling equipment globally. Equipment with higher fuel efficiency and lower or zero emissions are in demand to meet the stringent emission norms, which would drive the electric cargo handling equipment market during the forecast period.
