Abstracts

The global Ceiling Tiles market was valued at 6570.41 Million USD in 2021 and will grow with a CAGR of 3.49% from 2021 to 2027, based on HNY Research newly published report.

The prime objective of this report is to provide the insights on the post COVID-19 impact which will help market players in this field evaluate their business approaches. Also, this report covers market segmentation by major market vendors, types, applications/end users and geography(North America, East Asia, Europe, South Asia, Southeast Asia, Middle East, Africa, Oceania, South America).

Ceiling tiles are ancillary tiles and are made of various types of materials, including mineral wool, perlite, natural starch, gypsum, recycled paper, recycled tile, metal, and clay. Mineral tiles are produced from a varied number of raw materials, whereas wet tiles are produced from mineral wool, fiber, and recycled paper. Gypsum tiles are produced from soft minerals. These tiles have both functional and economic benefits; ceiling tiles aid in providing acoustics solutions, maintain the quality of air, ensure the reflection of natural light, and offer high aesthetic value. The acoustic segment is expected to lead the ceiling tiles market during the forecast period, in terms of value and volume. The growth of the acoustic segment can be attributed to the ability of ceiling tiles to control and minimize sound transmission. Acoustic ceiling tiles are ideal for use in commercial buildings, such as concert halls, recording studios, and seminar rooms.
