Chloroquine phosphate (also known as chloroquine) is an antimalarial medicine approved in the United States for either prevention or treatment of certain types of malaria and for treatment of extraintestinal parasites. Certain types of malaria, resistant strains, and complicated cases typically require different or additional medication. Chloroquine is also occasionally used for amebiasis that is occurring outside the intestines, rheumatoid arthritis, and lupus erythematosus. While it has not been formally studied in pregnancy, it appears safe. It is also being studied to treat COVID-19 as of 2020. Middle East and Africa is the dominant market in the global Chloroquine Phosphate market in terms of value. Sanofi and Bayer are the two players with the largest sales share, occupying 9.24% and 8.36% of the market share in 2019, respectively. And It is worth of noticing that chloroquine phosphate used in COVID-2019 will occupy 24.58% of the market share in 2020.
