The scrubber is a kind of cleaning machine suitable for cleaning hard ground while sucking the sewage and taking the sewage away from the site. It has the advantages of environmental protection, energy saving and high efficiency. First of all, in the global scrubbing machine industry, Liqi, Kärcher, and Germany Hako (Hako Group) are the leaders in this industry. However, the monopoly phenomenon in the scrubber industry is not obvious. Chinese enterprises have broken through the monopoly of the original industry giants on the scrubber market through continuous technological innovation. Secondly, the Chinese scrubber market mainly relies on raw material production and downstream demand. In the past five years, due to the increase in demand for downstream industries, the output of scrubbers has been increasing.
