A gas detector is a device that detects the presence of gases in an area, often as part of a safety system. This type of equipment is used to detect a gas leak and interface with a control system so a process can be automatically shut down. Gas detectors measure and indicate the concentration of certain gases in an air via different technologies. In 2015, major demand is expected to account 32.61% from USA in the global gas leak detector market, driven by increasing demand for replacement and occupational safety regulations. Other major demand is expected from emerging markets of Europe and contributed total 28.38 percent. China is occupied 18.11% market in gas leak detector industry, and will increase stably.
