## Abstracts

The global General Lighting market was valued at 3043.49 Million USD in 2021 and will grow with a CAGR of 4.32% from 2021 to 2027, based on HNY Research newly published report.

The prime objective of this report is to provide the insights on the post COVID-19 impact which will help market players in this field evaluate their business approaches. Also, this report covers market segmentation by major market vendors, types, applications/end users and geography (North America, East Asia, Europe, South Asia, Southeast Asia, Middle East, Africa, Oceania, South America).

The lighting industry includes general lighting, automotive lighting, and backlighting. General lighting is based on fixed light source installations, which deliver a practical or aesthetic lighting effect. CFLs, LFLs, HID lights, and LEDs are some of the major general lighting products. One trend in the market is growing number of households and urbanization. The rapid urbanization worldwide, particularly in emerging economies, is leading to the increasing demand for lighting devices from a growing number of households. The residential segment is one of the major contributors to the growing demand for lighting devices. One driver in the market is the declining manufacturing cost of LEDs. The manufacturing cost of LEDs has declined since 2012 and will continue to decline during the forecast period. This is mainly because of the declining ASP of chips and components used in the manufacturing process of LED devices. The decline in the manufacturing cost of LEDs is leading to a decrease in the initial installation cost of LED lamps and fixtures.
