In the report, we focused on the metal cleaning machine used in industrial application. As Chinese overall economic downward trend in the past few years, and international economic situation is complicated, in the next few years there will be many uncertainties, and coupled with many companies enter into Metal cleaning equipment industry in the past few years, the current demand for Metal cleaning equipment product is relatively low, lack of demand, excess supply. Ordinary Metal cleaning equipment products on the market do not sell well; Metal cleaning equipment price is lower than past years. The signal of market price change indicates the trend in the Metal cleaning equipment industry, low-end product has excess capacity, and high-end product is still in demand Metal cleaning equipment product demand market there is also a certain space, but basically showing the scarcity of high-end products, low-end products, excess capacity, there is a large market

demand for high-end products to seize market share of imports acts, local enterprises export more low-end products. Metal cleaning equipment is mainly used in automotive, general manufacturing and aerospace industry. With the recovery of global economy, the potential market in thesefield is still huge. Besides, investors should pay more attention to developing countries such as China, India and Middle-east. Along with the development of Chinese domestic equipment, Chinese domestic equipment has been very mature and advanced, and the performance distance has been shorten compared with the imported equipment. Although sales of Metal cleaning equipment brought a lot of opportunities, the study group recommends the new entrants just having money but without technical advantage and downstream support do not to enter into the Metal cleaning equipment field.
