Oil-free compressor is called oil-free air compressor, is the main body of the air source device, it is the prime mover (usually the motor) mechanical energy into gas pressure energy device, is the compressed air pressure generating device.From the perspective of the global market, oil-free compressor has been developed for many years.Low energy consumption, cost saving;The friction coefficient of seal is small, so the service life is long and the benefit is high.The advantages of compact structure, easy maintenance and good balance have been widely used in food and beverage, electronic industry, pharmaceutical industry and oil and gas industry.Japan, Europe and the United States dominate the global market for high-end oil-free compressors, which have strong competitiveness in terms of production scale, technology level, independent brand and intellectual property rights.The main manufacturers from Japan are Kobelco, Aerzen, Mitsui, Hitachi and Anest Iwata;Major European players include Atlas Copco, Ingersoll Rand, KAESER, Boge, Aerzen. And China manufacturers shouli and Gardner

Denver. This kind of enterprise product variety is complete, has the well-known brand and the independent intellectual property rights, the research and development strength is strong, according to the oil-free compressor is suitable for the special environment to develop in time conforms to the specific performance requirements of oil-free compressor products. Rapid development in recent years, China's oil free compressor market, steel enterprises in China by increasing investment and research and development, have a foothold in the international market, to participate in international competition and division of labor, to a certain extent, and obtain larger market share, but in terms of technical development and brand competition is still a certain gap compared with international large enterprises. Taiwan Fusheng and Nanjing Compressor Company are the main domestic enterprises in China producing oil-free compressors. Product prices are likely to continue to rise slightly over the next few years, but at a more moderate pace. In the future, the demand for oil-free compressors in the global market will increase year by year, and the sales volume will grow at a compound annual growth rate of about 1% from 2019 to 2025. So in the next few years, oil-free compressor sales will show a steady growth trend.
