Plasma Sterilizer, a medical device, uses low-temperature, hydrogen peroxide gas plasma technology to sterilize a wide range of instruments efficiently, effectively and safely. Hydrogen peroxide cold plasma technology is the most advanced sterilization technology available which offers highest sterilization efficacy without any toxic byproducts while preventing any damage to delicate medical equipment. In the coming years there is an increasing demand for Plasma Sterilizers in the regions of United States and Europe that is expected to drive the market for more advanced Plasma Sterilizers. Growth in government budgets in the principal countries, increasing of medical fields expenditures, more-intense competition, launches in introducing new products, retrofitting and renovation of old technology, increasing adoption of Plasma Sterilizers will drive growth in United States and Europe markets. Globally, the Plasma Sterilizers industry market is concentrated as the manufacturing technology of Plasma Sterilizers is relatively matures than some high-tech equipment. And some enterprises, like J&J, HMTS, Shinva, etc. are well-known for the wonderful performance of their Plasma Sterilizers and related services. At the same time, China and India, occupied

37.06% sales market share in 2016, is remarkable in the global Plasma Sterilizers industry because of their lowest cost of raw material and labor. The consumption volume of Plasma Sterilizers is related to downstream industries and global economy. As there will always be some uncertain in the global economy in the following years, the growth rate of Plasma Sterilizers industry may not keep that fast. But it is surely forecasted that the market of Plasma Sterilizers is still promising.
