The global Polyether Block Amide (PEBA) market was valued at 589.09 Million USD in 2021 and will grow with a CAGR of .7% from 2021 to 2027, based on HNY Research newly published report.

The prime objective of this report is to provide the insights on the post COVID-19 impact which will help market players in this field evaluate their business approaches. Also, this report covers market segmentation by major market vendors, types, applications/end users and geography(North America, East Asia, Europe, South Asia, Southeast Asia, Middle East, Africa, Oceania, South America).

Polyether block amide or PEBA is a thermoplastic elastomer (TPE). It is a block copolymer obtained by polycondensation of a carboxylic acid polyamide with an alcohol termination polyether (Polytetramethylene glycol PTMG), PEG). The general chemical structure is:HO - (CO - PA - CO - O - PE - O)_n - H Polyether block amide (PEBA) industry is concentrated relatively. Currently, there are several producing companies in the world polyether block amide (PEBA) industry. The main market players are Arkema, EVONIK, EMS and UBE. The sales of polyether block amide (PEBA) will increase to 34185 MT in 2016 from 27851 MT in 2011 with average growth rate of 4.19%. The global consumption value of polyether block amide (PEBA) increases with the 0.38% average growth rate. Europe and USA are the mainly consumption regions due to the bigger demand of downstream applications. In 2015, these two regions occupied 58.35% of the global consumption value in total. Polyether block amide (PEBA) mainly has two types, which include polyamide 11 elastomer and polyamide 12 elastomer with difference of raw materials. And each type has application industries relatively. With superior mechanical and dynamic properties of polyether block amide (PEBA), the

downstream application industries will need more polyether block amide (PEBA) products. So, polyether block amide (PEBA) has a huge market potential in the future. Manufacturers engaged in the industry are trying to produce good performance polyether block amide (PEBA) through improving technology. The major raw materials for polyether block amide (PEBA) are PTMG, PEG, PA 11 and PA 12. Fluctuations in the price of the upstream product would impact on the production cost of polyether block amide (PEBA). The production cost of polyether block amide (PEBA) is also an important factor which could impact the price of polyether block amide (PEBA). The polyether block amide (PEBA) manufacturers are trying to reduce production cost by developing production method. We tend to believe this industry is a rising industry, and the consumption increasing degree will show a smooth growth curve. And the price presents decreasing trend according to the economy development status and international competition. Also, it will be decreasing trend in gross margin.
