The global Switched Reluctance Motors market was valued at 40.51 Million USD in 2021 and will grow with a CAGR of 4.99% from 2021 to 2027, based on HNY Research newly published report.

The prime objective of this report is to provide the insights on the post COVID-19 impact which will help market players in this field evaluate their business approaches. Also, this report covers market segmentation by major market verdors, types, applications/end users and geography(North America, East Asia, Europe, South Asia, Southeast Asia, Middle East, Africa, Oceania, South America).

The switched reluctance motor (SRM) is a type of a stepper motor, an electric motor that runs by reluctance torque. Unlike common DC motor types, power is delivered to windings in the stator (case) rather than the rotor. This greatly simplifies mechanical design as power does not have to be delivered to a moving part, but it complicates the electrical design as some sort of switching system needs to be used to deliver power to the different windings. With modern electronic devices, precisely timed switching is not a problem, and the SRM is a popular design for modern stepper motors. Its main drawback is torque ripple.Currently, there are many producing companies in the world. The main market players are Nidec Corporation, AMETEK, VS Technology, Shandong Kehui Power Automation etcs. The production value of Switched Reluctance Motors is about 422.0 Million USD in 2016. North America is the largest consumption of Switched Reluctance Motors, with a sales market share nearly 31.3% in 2016. The second place is Europe; following North America with the sales market share over 29.05%.. Asia Pacific is another important consumption market of Switched Reluctance Motors.

Industry, Industrial Machinery and Others. Report data showed that 22.95% of the Switched Reluctance Motors market demand in Automobile Industry, 19.43% in C Appliance Industry, and 39.28% in Industrial Machinery in 2016. There are three kinds productions Constituting the Switched Reluctance Motors, which are 500 KW.
