## Abstracts

The global Timber Plants market was valued at 3540.36 Million USD in 2021 and will grow with a CAGR of 4.38% from 2021 to 2027, based on HNY Research newly published report.

The prime objective of this report is to provide the insights on the post COVID-19 impact which will help market players in this field evaluate their business approaches. Also, this report covers market segmentation by major market vendors, types, applications/end users and geography(North America, East Asia, Europe, South Asia, Southeast Asia, Middle East, Africa, Oceania, South America).

Cross-laminated timber (CLT) is a wood panel typically consisting of three, five, or seven layers of dimension lumber oriented at right angles to one another and then glued to form structural panels with exceptional strength, dimensional stability, and rigidity. CLT can be manufactured to customized dimensions and panel sizes vary by manufacturer while length is usually limited by transportation restrictions. We tend to believe this industry is a rising industry, and the consumption increasing degree will show a smooth growth curve. And the price presents fluctuation according to the economy development status and international competition. Also, there is fluctuation in gross margin. Global Timber Plants market size will increase to 4430 Million US\$ by 2025, from 3410 Million US\$ in 2018, at a CAGR of 3.8% during the forecast period. In this study, 2018 has been considered as the base year and 2019 to 2025 as the forecast period to estimate the market size for Timber Plants.
