## Abstracts

The global Titanium Powder market was valued at 346.88 Million USD in 2021 and will grow with a CAGR of .3% from 2021 to 2027, based on HNY Research newly published report.

The prime objective of this report is to provide the insights on the post COVID-19 impact which will help market players in this field evaluate their business approaches. Also, this report covers market segmentation by major market vendors, types, applications/end users and geography(North America, East Asia, Europe, South Asia, Southeast Asia, Middle East, Africa, Oceania, South America).

Titanium powder is the result of processing this metal in a variety of ways to produce a fine metal powder. A silvery metal, titanium is highly valued for its great strength and unmatched corrosion resistance. Titanium powder has a variety of specifications with purity range from 95% to 99.98%. It is widely used in aerospace industry, automobile industry, petrochemical industry etc. North America and Asia-Pacific are the main consumption regions. In 2017, these two regions occupied 78.99% of the global consumption volume. Titanium powder mainly has three types, which include high purity titanium powder (CPTP) and alloyed titanium powder (ATP). And each type has application industries relatively. With growth of powder metallurgy, the downstream application industries will need more titanium powder. So, titanium powder has a huge market potential in the future. The major raw materials for titanium powder are titanium sponge, H<sub>2</sub>, titanium tetrachloride (TiCl<sub>4</sub>) and other auxiliary chemicals. Fluctuations in the price of the upstream product will impact on the production cost of titanium powder. The production cost of titanium powder is also an important factor which could impact the price of titanium powder. We tend to believe this industry is a rising industry, and the

consumption increasing degree will show a smooth growth curve. And the price presents fluctuation according to the economy development status and international competition. Also, there is fluctuation in gross margin.
