The global 1,2,4,5-Tetramethylbenzene (Durene) market was valued at 76.95 Million USD in 2021 and will grow with a CAGR of 2.88% from 2021 to 2027, based on HNY Research newly published report.

The prime objective of this report is to provide the insights on the post COVID-19 impact which will help market players in this field evaluate their business approaches. Also, this report covers market segmentation by major market vendors, types, applications/end users and geography(North America, East Asia, Europe, South Asia, Southeast Asia, Middle East, Africa, Oceania, South America).

1,2,4,5-tetramethylbenzene, namely durene, is a kind of colorless crystals solid powder(some companies` products are liquid for their low technology) with the formula  $C_6H_2(CH_3)_4$ . They can be divided into industry grade and reagent grade. They can be used for manufacturing PMDA, as organic synthesis intermediate or in other fields. At present the abroad companies usually put the 1,2,4,5-tetramethylbenzene used for the manufacture of PMA & PMDA directly, very few companies sold 1,2,4,5-tetramethylbenzene products. In China, the 1,2,4,5-tetramethylbenzene manufacturers sells them as the products, and partly of the companies used them as materials for the producing of PMA & PMDA too. So in this report we only static the products which transferring in the market not including the products which are not sold in the market. However, at present only the China manufacturers sold their products in the market, so in this report the companies are all China players. The main production process is to use C10 aromatic hydrocarbon, a kind of by-product of petrochemical industry, as the raw material. The big producers` production facilities are usually located close to the supplier of raw material. Therefore, it`s convenient for them to obtain it.
