### Abstracts

The global 3D Metrology market was valued at 699.84 Million USD in 2021 and will grow with a CAGR of 6.22% from 2021 to 2027, based on HNY Research newly published report.

The prime objective of this report is to provide the insights on the post COVID-19 impact which will help market players in this field evaluate their business approaches. Also, this report covers market segmentation by major market vendors, types, applications/end users and geography(North America, East Asia, Europe, South Asia, Southeast Asia, Middle East, Africa, Oceania, South America).

3D Metrology refers to 3D Metrology Equipment. The 3D Metrology Equipment is the dimensional analysis method used to overall measure the object and acquires all surface points of an object including the hidden points such as non-accessible undercuts. The 3D Metrology Equipment is divided into fixed coordinate measuring machines (CMM), optical digitizers and scanners (ODS), and 3D video measuring machines (VMM) by product. These products are used in the quality control process to ensure the accuracy of manufactured products. They are widely used in the industries such as automotive, aerospace, transportation, constructional, power generation, electronics, medical technology and others. The Consumption of 3D Metrology increases from 151241 Units in 2011 to 232534 Units in 2016, with an average growth rate of 10.75%. The whole market value is 6298.6 million USD in 2016. This industry is relatively scattered. Top 3 companies in the market occupies about 15.63% of the Revenue market shares in 2016. The major manufacturers of 3D Metrology are Hexagon, Zeiss, FARO, Renishaw, Nikon, GOM, Mitutoyo, Keyence, Perceptron, 3D Digital Corp, Wenzel, Zygo and others. The biggest growth driver of the global metrology services market is the high adoption rate of CAD/CAM and rising

implementation of international quality standards. Other factors contributing to the growth of this market are the shortage of skilled labor to operate precision machines and the poor utility value of the existing measuring equipment. In addition to this, accumulation and analysis of 3D data is also propelling the global metrology services market.
