The global 3D Scanner market was valued at 1868.37 Million USD in 2021 and will grow with a CAGR of 6.12% from 2021 to 2027, based on HNY Research newly published report.

The prime objective of this report is to provide the insights on the post COVID-19 impact which will help market players in this field evaluate their business approaches. Also, this report covers market segmentation by major market vendors, types, applications/end users and geography(North America, East Asia, Europe, South Asia, Southeast Asia, Middle East, Africa, Oceania, South America).

There are many different devices that can be called 3D scanners. Any device that measures the physical world using lasers, white lights or x-rays and generates dense point clouds or polygon meshes can be considered a 3D scanner. They go by many names, including 3D digitizers, laser scanners, white light scanners, industrial CT, LIDAR, and others. The common uniting factor of all these devices is that they capture the geometry of physical objects with hundreds of thousands or millions of measurements. The global 3D scanner industry mainly concentrates in Europe and the USA. The global leading players in this market are Hexagon, Trimble Navigation and Faro Technologies, which accounts for 26% of total revenue in 2015. In China the market leaders are Hi-target and Shanghai Digitalmanu.
