The global Acetic Anhydride market was valued at 4825.77 Million USD in 2021 and will grow with a CAGR of 5.19% from 2021 to 2027, based on HNY Research newly published report.

The prime objective of this report is to provide the insights on the post COVID-19 impact which will help market players in this field evaluate their business approaches. Also, this report covers market segmentation by major market vendors, types, applications/end users and geography(North America, East Asia, Europe, South Asia, Southeast Asia, Middle East, Africa, Oceania, South America).

Acetic anhydride is produced from acetic acid. Acetic anhydride has strong lachrymatory properties and a pungent odor. It is colorless and has corrosive properties, which makes it harmful for humans. It is mainly utilized in the production of cellulose acetate. In terms of demand, North America is the leading region owing to huge demand from cellulose acetate market coupled with huge demand from pharmaceutical industry. However, the market for acetic anhydride is declining in North America region due to strict environmental regulations. Asia Pacific is anticipated to be the fastest growing market for acetic anhydride due to increasing demand from various end-user industries such as pharmaceutical, textiles, and polymers among others. The demand for acetic anhydride is huge from countries such as Japan, China and India. China and Japan were the leading consumers of acetic anhydride in Asia Pacific region.
