Abstracts

The global Aerobridge market was valued at 855.83 Million USD in 2021 and will grow with a CAGR of 6.92% from 2021 to 2027, based on HNY Research newly published report.

The prime objective of this report is to provide the insights on the post COVID-19 impact which will help market players in this field evaluate their business approaches. Also, this report covers market segmentation by major market vendors, types, applications/end users and geography(North America, East Asia, Europe, South Asia, Southeast Asia, Middle East, Africa, Oceania, South America).

Aerobridge is an enclosed, movable bridge which connects the airport terminal to aircraft parked there, so passengers can move directly to and from the plane without having to step out onto the tarmac. Increasing passenger traffic at domestic as well as international airports is expected to drive the market. Moreover, increasing investments in installing operating aerobridges for domestic flights and rise in passenger in tier-II cities of developing countries are also expected to drive the market. However, lack of technical knowledge in handling the aerobridge causing accidents may limit the growth of the market.?
