The global Aerogel market was valued at 490.87 Million USD in 2021 and will grow with a CAGR of 8.36% from 2021 to 2027, based on HNY Research newly published report.

The prime objective of this report is to provide the insights on the post COVID-19 impact which will help market players in this field evaluate their business approaches. Also, this report covers market segmentation by major market vendors, types, applications/end users and geography(North America, East Asia, Europe, South Asia, Southeast Asia, Middle East, Africa, Oceania, South America).

Aerogel, also known as xerogel, is a gel obtained by reacting a chemical solution to form a sol and then gelling. The solvent in the gel is removed to obtain a spatial network structure filled with gas, and the appearance is Solid-like porous material with very low density (close to air density).Aerogels have ultra-light, low-density, nano-pores, and are characterized by ultra-fine honeycomb pore size and porous structure, which are composed of interconnected polymer chains. It is usually less than 100 nm, and the aerogel particle size is usually less than 20 nm. It can be made of inorganic materials (such as silica, alumina, etc.), organic materials (such as polyethylene glycol, carbon, etc.), or mixed materials (such as gel glass, etc.). At present, silicon-based aerogels are mainly used in the market. Aspen Aerogel, Cabotcorp, Nanuo are major manufacturers in the Aerogel market. Cabotcorp dominated with nearly 30% production value share. Based on region, China is the largest market segment of Aerogel, with a production market share nearly 46%, followed by North America and Europe. Aerogel used in industry including Oil and Gas, Building Insulation, Transportation, etc. Report data showed that about 45% of the Aerogel market demand is Oil and Gas. Moreover, the type of production can be spilled by Aerogel Felt, Powder and so on.
