The global Aerosol Refrigerants market was valued at 914.13 Million USD in 2021 and will grow with a CAGR of 5.07% from 2021 to 2027, based on HNY Research newly published report.

The prime objective of this report is to provide the insights on the post COVID-19 impact which will help market players in this field evaluate their business approaches. Also, this report covers market segmentation by major market vendors, types, applications/end users and geography(North America, East Asia, Europe, South Asia, Southeast Asia, Middle East, Africa, Oceania, South America).

Refrigerants are used in a refrigeration cycle for cooling. During refrigeration, a refrigerant undergoes phase transitions. Chlorofluorocarbon, one of the most common refrigerant, is getting phased out due to its high ozone-depleting potential. Our analysts have estimated that during 2017, EMEA dominated the market during 2017. Owing to the increased use of aerosol refrigerants in domestic refrigeration and mobile air conditioning applications, this region will account for the maximum aerosol refrigerants' market size during the next few years as well.
