The global AES Resin market was valued at 109.75 Million USD in 2021 and will grow with a CAGR of 3.46% from 2021 to 2027, based on HNY Research newly published report.

The prime objective of this report is to provide the insights on the post COVID-19 impact which will help market players in this field evaluate their business approaches. Also, this report covers market segmentation by major market vendors, types, applications/end users and geography(North America, East Asia, Europe, South Asia, Southeast Asia, Middle East, Africa, Oceania, South America).

AES resin (acrylonitrile EPDM rubber/styrene copolymer) has excellent weather resistance, even if long time exposure to ultraviolet light, moisture, rain, outdoor light and ozone conditions without coating as well as the physical stability. Especially suitable for coating used directly in the outdoor. ABS resin has excellent formability, impact resistance and gloss properties, but due to the use of butadiene rubber in synthesis of ABS in containing a double bond structure, so easy to decomposition of ultraviolet radiation, heat and oxidation. So AES is made without a double bond structure to overcome the flaw of ABS and AES is a kind of excellent weatherability resin increasingly used in automobile, household appliances, electronics and outdoor decoration. Automobile is the biggest applied field maybe for the automobile market is huge and the demand of resin in rearview mirror, tires and other parts is big. In 2016, the sale volumes in automobile are 6574 MT, taking 37.93%. According to the different properties, AES can be divided into general grade, high impact grade, heat resistant grade and other. General grade is used most widely and the price is the lowest, in 2016, about 47.59% of the global sale volumes are general grade.
