The prime objective of this report is to provide the insights on the post COVID-19 impact which will help market players in this field evaluate their business approaches. Also, this report covers market segmentation by major market vendors, types, applications/end users and geography(North America, East Asia, Europe, South Asia, Southeast Asia, Middle East, Africa, Oceania, South America).

The aesthetic lasers and energy devices are used for the treatment of sun damage skin, wrinkles and unwanted lesions. It is also used for treating acne and removing tattoos. Increasing incidences of skin damage and rapidly changing lifestyle are additionally propelling the aesthetic lasers and energy devices market. First, for industry structure analysis, the Aesthetic Lasers and Energy Devices industry is relatively concentrated. These manufacturers range from large multinational corporations to small privately owned companies compete in this industry. The top five producers account for about 53.09 % of the revenue market. Regionally, USA is the biggest production value area of valves, also the leader in the whole Aesthetic Lasers and Energy Devices industry. Second, the production of Aesthetic Lasers and Energy Devices increased from 65412 units in 2011 to 117786 units in 2015 with an average growth rate of 14.35%. Third, USA occupied 52.29% of the production market in 2015. It is followed by China and Israel, which respectively account for around 20.09% and 12.42% of the global total industry. Other countries have a smaller amount of production. Geographically, USA was the largest consumption market in the world, which took about 38.17% of the global consumption volume in 2015. Fourth, for price trend analysis, a key variable in the

performance of Aesthetic Lasers and Energy Devices producers is raw material costs, specifically the speed at which any increase can be passed through to customers. Fifth, for forecast, the global Aesthetic Lasers and Energy Devices revenue would keep increasing with annual growth rate with 9~12%. We tend to believe that this industry still has a good future, considering the current demand of Aesthetic Lasers and Energy Devices.
