The global Aftercoolers market was valued at 5791.48 Million USD in 2021 and will grow with a CAGR of 3.92% from 2021 to 2027, based on HNY Research newly published report.

The prime objective of this report is to provide the insights on the post COVID-19 impact which will help market players in this field evaluate their business approaches. Also, this report covers market segmentation by major market vendors, types, applications/end users and geography(North America, East Asia, Europe, South Asia, Southeast Asia, Middle East, Africa, Oceania, South America).

Aftercoolers are heat exchangers that remove the heat from compressed air. The most common compressor aftercoolers use much cooler ambient air or cool water to remove the heat, which is also effective in removing moisture from compressed air. The North American aftercoolers market is expected to witness substantial growth over the forecast period due to changed government regulations in industrial by-products and waste management. The aftercoolers market in Asia Pacific and Middle East is foreseen to continue on a trajectory of high growth over the forecast period, on account of growing industrialization and liberalization of administration policies related to manufacturing industries. Latin America is expected to show a stable growth rate over the forecast period.
