The global Agricultural Fumigants market was valued at 119.3 Million USD in 2021 and will grow with a CAGR of 2.7% from 2021 to 2027, based on HNY Research newly published report.

The prime objective of this report is to provide the insights on the post COVID-19 impact wwhich will help market players in this field evaluate their business approaches. Also, this report covers market segmentation by major market verdors, types, applications/end users and geography(North America, East Asia, Europe, South Asia, Southeast Asia, Middle East, Africa, Oceania, South America).

Agricultural fumigants are injected into the soil and move through the soil air and dissolve in the water in the soil where they kill pests, and also used on grains and crops post-harvest to reduce insects, ticks and mites, nematodes, slugs and snails and fungal diseases. In the report, the statistics refer to agricultural fumigants as materials for fumigants pesticides. There are common fumigants materials such as Methyl Bromide, Phosphine, Chloropicrin, Metam Sodium, 1, 3-Dichloropropene. The technical barriers of agricultural fumigants are not high, resulting in numerous manufacturing enterprises. In agricultural fumigants materials market, there are some relatively larger companies across the globe, such as Dow, AMVAC, ADAMA Agricultural, FMC Corporation, BASF, Syngenta, UPL Group, Detia-Degesch, Arkema, Chemtura, Eastman, and Solvay. Their plants mainly distribute in USA, China and Europe. Agricultural fumigants materials are primarily used to produce fumigants pesticide, and eventually applied in soil and warehouse. With increasing of global population and economy, the demands for agricultural product keep high growth. With the improvement of people's health awareness, the product structure has been changed in these years and agricultural fumigants are expected to continue increasing during the remaining years of the

forecast period of 2017-2022. Agricultural fumigants industry will usher in a stable growth space. In the past few years, the price of agricultural fumigants has slightly decreased and we expect the price will slightly lower. However, the improvement of energy, transportation costs, employee wages, and equipment depreciation will play a significant role in promoting the cost of agricultural fumigants.
