### Abstracts

The global Agro Textiles market was valued at 8253.33 Million USD in 2021 and will grow with a CAGR of 2.57% from 2021 to 2027, based on HNY Research newly published report.

The prime objective of this report is to provide the insights on the post COVID-19 impact which will help market players in this field evaluate their business approaches. Also, this report covers market segmentation by major market vendors, types, applications/end users and geography(North America, East Asia, Europe, South Asia, Southeast Asia, Middle East, Africa, Oceania, South America).

The word 'Agro textiles' now is used to classify the woven, nonwoven and knitted fabrics applied for agricultural and horticultural uses covering livestock protection, shading, weed and insect control, and extension of the growing season. The essential properties required are Strength, elongation, stiffness, porosity, bio-degradation, resistance to sunlight and resistance to toxic environment. Europe is a mature market and hence the demand is anticipated to be sluggish over the forecast period. Large agricultural textiles demand in Europe is attributed to favourable government regulations regarding reusability of polymers and bio based products. Thus, Europe is anticipated to witness stagnant growth in the agriculture textiles market over the forecast period.
