Air Chain Hoists, often referred to as pneumatic hoists; utilize a rotary or piston-driven motor powered by compressed air. Air passes through the system and cools the hoist as it operates, so air chain hoists can run continuously without rest or risk of overheating?unlike an electric hoist system.In the coming years there is an increasing demand for Air Chain Hoists in the regions of North America and Europe that is expected to drive the market for more advanced Air Chain Hoists. Growth in government budgets in the principal countries, increasing of industrial fields expenditures, more-intense competition, launches in introducing new products, retrofitting and renovation of old technology, increasing adoption of Air Chain Hoists will drive growth in North America and Europe markets.
