Abstracts

The global Air Freight Unit Load Device (ULD) market was valued at 371.39 Million USD in 2021 and will grow with a CAGR of 4.69% from 2021 to 2027, based on HNY Research newly published report.

The prime objective of this report is to provide the insights on the post COVID-19 impact which will help market players in this field evaluate their business approaches. Also, this report covers market segmentation by major market vendors, types, applications/end users and geography(North America, East Asia, Europe, South Asia, Southeast Asia, Middle East, Africa, Oceania, South America).

Air Freight Unit Load Device (ULD) is a pallet or container used to load luggage, freight, and mail on wide-body aircraft and specific narrow-body aircraft. It allows a large quantity of cargo to be bundled into a single unit. Since this leads to fewer units to load, it saves ground crews time and effort and helps prevent delayed flights. Each ULD has its own packing list (or manifest) so that its contents can be tracked. The largest share is taken by TransDigm (Nordisk & AAR Cargo) , Satco, Inc. and Safran (Zodiac Aerospace), which together account for a share close to 37 % of Air Freight Unit Load Devices market globally. In terms of regions, the Asia-Pacific area represents the largest piece of global ULD market with 39% of the world total, followed by Europe at 33% and North America at 23%. In the forecast, more new investment will be attracted into this field.
