Air Pollution Analyzer is a device to analyze the single/multiple gas or solid pollutants in ambient air. Many manufacturing processes emit pollutants that may accumulate in the atmosphere or on land and water. Air pollutants are frequently monitored in environmental stations that may be housed in temporary or permanent structures strategically located throughout a region. These stations are equipped with gas analyzers and particulate samplers. Thermo Fisher Scientific, Emerson and Siemens are the top 3 of global Air Pollution Analyzer, with about 15% market shares.
