The global Air Separation Plant market was valued at 336.25 Million USD in 2021 and will grow with a CAGR of 4.76% from 2021 to 2027, based on HNY Research newly published report.

The prime objective of this report is to provide the insights on the post COVID-19 impact which will help market players in this field evaluate their business approaches. Also, this report covers market segmentation by major market vendors, types, applications/end users and geography(North America, East Asia, Europe, South Asia, Southeast Asia, Middle East, Africa, Oceania, South America).

Air Separation Plant is the equipment used in the separation of the air, which is used to produce the oxygen, nitrogen, etc. The future market of air separation plant depends on the development of technology, demand and suppliers of air separation unit. Worldwide Installations are not performing in a high lightened way because of sluggish economy. Europe is the largest production market. China is still the fastest growing country, but the speed is expected to slow down because of economic outlook, and the government's capacity reduction policy has brought negative effect on the demand of Air Separation Plant installation. As international economic situation is complicated, in the next few years there will be many uncertainties. Because of the support of government's policy, more companies are entering air separation plant industry. Although sales of Air Separation Plant show a lot of opportunities, the study group recommends the new entrants who just have money but without technical advantage and downstream support, do not to enter into this industry.
