The global Airborne Particle Counter market was valued at 172.74 Million USD in 2021 and will grow with a CAGR of 3.43% from 2021 to 2027, based on HNY Research newly published report.

The prime objective of this report is to provide the insights on the post COVID-19 impact which will help market players in this field evaluate their business approaches. Also, this report covers market segmentation by major market vendors, types, applications/end users and geography(North America, East Asia, Europe, South Asia, Southeast Asia, Middle East, Africa, Oceania, South America).

Airborne Particle Counter is the equipment for determining airborne particle concentrations. First, for industry structure analysis, the Airborne Particle Counter industry is relatively concentrated. These manufacturers range from large multinational s to small privately owned companies compete in this industry. The top five producers account for about 55 % of the revenue market. Regionally, North America is the biggest Sales value area, also the leader in the whole Airborne Particle Counter industry. Second, the Sales of Airborne Particle Counter increased from 28114 units in 2012 to 33997 units in 2016 with an average growth rate of 4.87%. Third, North America occupied 32.19% of the Sales market in 2016. It is followed by Europe and Asia-Pacific, which respectively account for around 28.84% and 26.76% of the global total industry. Other countries have a smaller amount of Sales. Fourth, for price trend analysis, a key variable in the performance of Airborne Particle Counter producers is raw material costs, specifically the speed at which any increase can be passed through to customers. Fifth, for forecast, the global Airborne Particle Counter revenue would keep increasing with annual growth rate with 3~5%. We tend to believe that this industry still has a good future, considering the current demand of Airborne Particle Counter.
