The global Aircraft Oxygen System market was valued at 389.87 Million USD in 2021 and will grow with a CAGR of 6.38% from 2021 to 2027, based on HNY Research newly published report.

The prime objective of this report is to provide the insights on the post COVID-19 impact which will help market players in this field evaluate their business approaches. Also, this report covers market segmentation by major market vendors, types, applications/end users and geography(North America, East Asia, Europe, South Asia, Southeast Asia, Middle East, Africa, Oceania, South America).

Chemical oxygen generators provide oxygen through chemical reaction. These generators have a limited shelf life, after which they must be replaced. Chemical oxygen generators for passengers are installed in the overhead compartments above the passenger seats. The high growth of the chemical oxygen generator segment in the CAOS market is due to a recent mandate by the FAA to install chemical oxygen generators in aircraft carrying more than 20 passengers. The European region is the second-largest market for chemical oxygen generators.
