Alcohol enzymes is an enzyme group that occurs in organisms to facilitate hydrolysis and ease the inter conversion between alcohol and aldehydes due to the reduction of nicotinamide adenine dinucleotide. They are used as catalysts in the process of conversion of complex molecules in different metabolic reactions. North America is the largest regional market for alcohol enzymes. Rising health concerns and increasing use of cosmetics are considered the key drivers for the growth in demand for alcohol enzymes in the region. Moreover, increasing demand for bio-fuels is expected to further drive the growth of market in this region. Asia Pacific is expected to be the fastest growing region for alcohol enzymes during the forecast period. Rapid industrialization and developing pharmaceutical & biotechnology industries in emerging economies such as India and China is expected to be the key driving factor for the growth of alcohol enzyme market in this region. In addition, favourable business environment coupled with government initiatives to promote usage of bio-fuels is expected to further boost the demand for alcohol enzymes in the region.
